

January 20 2017

President Trump

Today's ceremony however has very special meaning.

Because.

"Today we are not merely transferring power from one administration to another or from one party to another," "We are transferring power from Washington, D.C. and giving it back to you, the people."

President Trump said these words with the military standing behind him

And before he was done speaking the military turned and walked away

They were carrying the Military Power away from the Government and giving it back to the People Where It Belongs

Under the Insurrection act the military has three commands to follow

The Commander in Chief President Trump

The Commands in the United States constitution

And the commands giving By We the People

And the Military Law of War Manual has the Rules.

The problem is the elites knew what Trump said but We the People as a collective didn't hear it and or understand it's meaning if they did hear it. It is up to We the People as a collective to make our demands not only heard but to enforce them. We are the boss they are our employees/subjects.

If we demanded that prior to placing your name on an election ballot as our representative or appointee, you SHALL submit to a thorough background investigation. The results of that investigation SHALL be shared with We the People of that given State.

If we demanded that a new Oath SHALL be in order repeating the ORGANIC title of the United States of America's constitution as "this Constitution for the United States of America" and sign a copy of it as your employment contract. Should said employee breach this contract penalties SHALL be in order and depending on the severity of the breach, said representative SHALL be terminated with their golden parachute benefits, Jailed, or receive the death penalty.

If We the People of a given State demand their State Constitution be rewritten and voted on by, We the People, it Shall be done. We are to be recognized as a sovereign people and that our rights come from our Creator.

So, these, then, are the foundational principles of our Constitutional Republic:

- Our Rights are unalienable and come from God.
- The purpose of civil government is to protect our God-given Rights.
- Civil government is legitimate only when it operates with our consent; & Since the USA Constitution is the formal expression of the Will of the People, the federal government operates with our consent only when it obeys the Constitution.

Because the Declaration of Independence identifies The Creator as Grantor of Rights, we look to The Bible – or the Natural Law – to see what those rights are. The Bible – or the Natural Law – reveals many rights, such as the rights to Life, Liberty, the Pursuit of Happiness; to inherit, earn, and keep property; the right of self-defense; the right and duty to demand that the civil authorities obey the Law; the right to speak; the right to live our lives free from interference from civil government; the rights of parents to raise their children free from interference from civil government; the right to worship God; etc.

The distinguishing characteristics of all God-given or Natural Rights 1 are: **Each one may be held and enjoyed at NO expense or loss to any other person;** and We can look them up for ourselves! They are not subject to someone else's interpretations.

However, not one State has incorporated our rights into their State Constitutions. That is a serious breach of contract. All state constitutions recognized us as citizen subjects to the rights they give us.

People

We already have our First Documents for New State Government's

All we have to do is set the Rules up

For our new Constitutions

And it better have the idea presented in this post above front and center

<https://archive.org/details/in-america-the-people-rule-the-people-govern-the-people-are-sovereignand-the-rea>

First these states have to ratify a new Republican Form of Constitutional Government

And then the Commander in Chief can By Proclamation

Like this

Proclamation 153—Declaring the Insurrection in Certain Southern States to be at an End

<https://www.presidency.ucsb.edu/documents/proclamation-153-declaring-the-insurrection-certain-southern-states-be-end>

And then within 120 Days this Country will have a new election for

The president and congress of our federal Government
